

## STATEMENT OF COMPATIBILITY

By and between

### **Kaspersky Industrial Cyber Security Suite 2.0**

product of

#### **AO KASPERSKY LAB**

39A/2 Leningradskoe Shosse,  
Moscow, 125212, the Russian Federation

hereinafter referred to as "KICS" resp. "Kaspersky"

and

### **WinCC Open Architecture 3.15**

product of

#### **ETM professional control GmbH,**

A Siemens Company  
Marktstraße 3, A-7000 Eisenstadt

hereinafter referred to as "WinCC OA" resp. "ETM".

**ETM and Kaspersky** hereby agree on the following statement regarding the use of their products on a common IT system, their products compatibility and the contribution of these products to fulfill certain IT security requirements:

"WinCC OA 3.15 and KICS 2.0 are both software products that are developed to be used in the field of industrial automation. WinCC OA is a SCADA system. KICS is a security tool suite.

ETM and Kaspersky have carried out extensive compatibility tests for the common use of their products on an IT system. The outcome of the tests was that, subject to their individual system requirements, the products may be used on the same IT system. The tests did not reveal any critical incompatibility issues between the products.

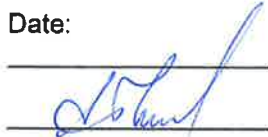

In case both products are installed on the same IT system their functionalities can contribute to fulfill essential IT security requirements as defined in the Order 31 ("*On Approval of Requirements to ensure the protection of information in automated systems control of production and technological processes in critical facilities, potentially dangerous objects, and objects that represent an increased danger to life and human health and to the environment*") released by the Russian Federal Service for Technical and Export Control (FSTEC) on March 14<sup>th</sup>, 2014.

Apart from the installation and use of both products, other measures will be necessary to fulfill the whole scope of the requirements stipulated in Order 31. The actual measures will depend on the circumstances of the individual case. Such measures may, among others, include installation and usage of other products, appropriate product configuration and implementation of certain organizational measures. The certification procedure and decision itself will be handled by and at the discretion of the certifying authority.
