STATEMENT OF COMPATIBILITY

between
Kaspersky Industrial CyberSecurity
the product of
AO “Kaspersky Lab”
39A/2 Leningradskoe Shosse,
Moscow, 125212, the Russian Federation
hereinafter referred to as “KICS” and “Kaspersky” respectively

and
Software and hardware complex “TOPAZ”
the product of
JSC “PLC Technology”
17 Scientific travel, Moscow, Russia
hereinafter referred to as “TOPAZ” and “PLC Technology” respectively.

PLC Technology and Kaspersky Lab hereby declare the possibility of mutual apply of the mentioned software products in unified information system, compatibility of these software products, allowing to meet certain information security requirements for automated process control systems (hereinafter referred to as APCS), these products are operated.

TOPAZ designed specifically for the electric power industry designed for the construction of systems for collecting and transmitting digital information as part of APCS and telemechanical substations. KICS is an integrated cybersecurity solution for critical infrastructure and industrial automation.

PLC Technology and Kaspersky Lab conducted extensive testing of the TOPAZ and KICS compatibility within unified information system. Tests proved the possibility of use the products in unified information system, taking into account their individual environmental requirements. The tests have not revealed any compatibility problems in products.

Jointly established that within the unified information system functionality of TOPAZ and KICS,

Kaspersky
according to requirements and installation and control guidelines, provides realization of part of information security requirements for industrial control systems.

Besides installing and using both products, other measures may be necessary to complete all information security requirements for each specific class of automated systems. The actual measures taken should depend on the specific information security requirements for the object, as well as the APCS architecture of the object. Such measures may include, but are not limited to, installation and implementation of other software or hardware products, appropriate product configuration, and creation or adjustment of organizational processes.
