STATEMENT OF COMPATIBILITY

between

Kaspersky Industrial CyberSecurity

the product of

AO "Kaspersky Lab"
39A/2 Leningradskoe Shosse,
Moscow, 125212, the Russian Federation

hereinafter referred to as "KICS" and "Kaspersky" respectively

and

Software and hardware complex “VNIIR-SCADA”

the product of

Open Society “VNIIR”
4 I. Yakovleva Ave, Cheboksary, 428024, Chuvash Republic, Russia

hereinafter referred to as «VNIIR-SCADA» and «VNIIR» respectively.

VNIIR and Kaspersky Lab hereby declare the possibility of mutual apply of the mentioned software products in unified information system, compatibility of these software products, allowing to meet certain information security requirements for automated process control systems (hereinafter referred to as APCS), these products are operated.

VNIIR-SCADA is the automation system designed to create data collection and transmission systems, dispatch control and monitoring of various scales. KICS is an integrated cybersecurity solution for critical infrastructure and industrial automation.

VNIIR and Kaspersky Lab conducted testing of the VNIIR-SCADA and KICS compatibility within unified information system. Tests proved the possibility of use the products in unified information system, taking into account their individual environmental requirements. The tests have not revealed any compatibility problems in products.

Jointly established that within the unified information system functionality of VNIIR-SCADA products and KICS their functionality, according to requirements and installation and control guidelines, ensure compliance with part of information security requirements imposed on APCS.
Besides installing and using both products, other measures may be necessary to complete all information security requirements for each specific class of automated systems. The actual measures taken should depend on the specific information security requirements for the object, as well as the APCS architecture of the object. Such measures may include, but are not limited to, installation and implementation of other software or hardware products, appropriate product configuration, and creation or adjustment of organizational processes.
